

Reading main effects and interaction effect from graphs

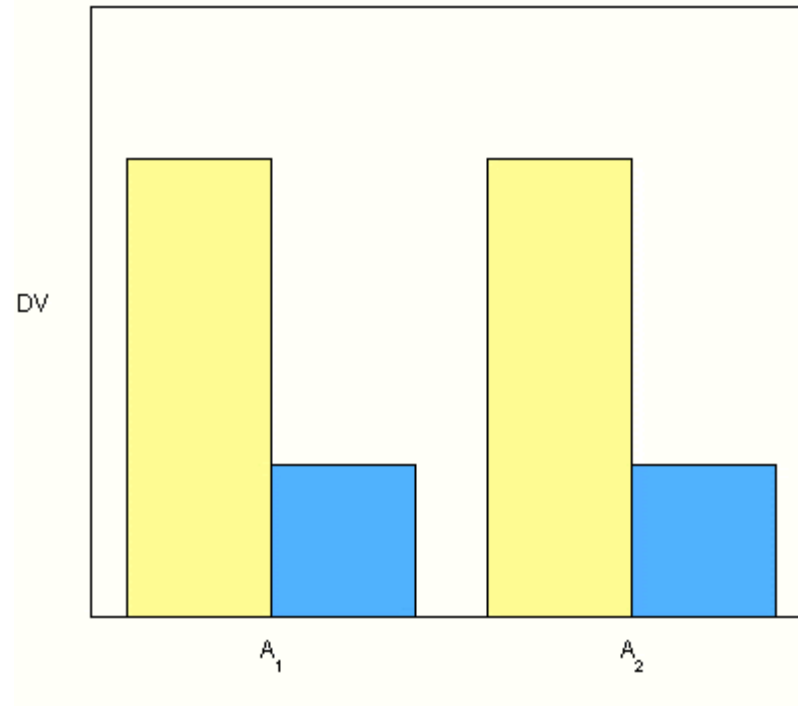

- For Age, average of diamond and circle for age 7 vs. average of diamond and circle for age 15. YES
- For expectations, average (middle point) of diamonds vs. average of circles. YES
- Interaction, cross over; non-parallel lines. YES

- For Age, average of diamond and circle for age 7 vs. average of diamond and circle for age 15. No
- For expectations, average (middle point) of diamonds vs. average of circles. No
- Interaction, cross over; non-parallel lines. YES

- For A, average of A1 vs. average of A2. YES
- For B, average of B1 vs. average of B2. NO
- Interaction, difference, different. NO

- For A, average of A_1 vs. average of A_2 . NO
- For B, average of B_1 vs. average of B_2 . Yes
- Interaction, difference, different. NO
