

Homework 14

Security issues in electronic voting

The issues to be highlighted:

- ✚ Motivation
- ✚ Technologies
- ✚ Risk factors
- ✚ Accuracy
- ✚ Privacy
- ✚ Usability
- ✚ Cryptographic protocols for electronic voting

Recommended papers:

1. An Introduction to Electronic Voting
2. A Discussion of Cryptographic Protocols for Electronic Voting

The above two papers are useful, but perhaps not enough to prepare the presentation. It is expected that the student will gather more information in this field.
